

Refusal Visa SOP Sample - Financial Planning Services Program

To,
Visa Officer,
Canada High Commission,
Immigration Department,

Subject: Reapplication of a study permit to Canada

Respected Sir/Madam,

Thank you for allowing me to reapply for the study permit to live my cherished dream of studying in Canada. My name is <name>, and I have applied for the Financial Planning Services program from Conestoga College, Canada. I wish to state that my application for a study permit was rejected on <date>, saying,

“I am not satisfied that you will leave Canada at the end of your stay, as stipulated in subsection 216(1) of the IRPR, based on the purpose of your visit”.

Henceforth, I have penned down my entire trajectory to explain my honest intention to study in Canada with this statement of purpose.

Refusal Justification

Purpose of Visit

I'm applying with a clear and focused goal of studying without becoming a possible immigrant or a burden in Canada. I am aware of the numerous advantages that studying in a Western nation may provide, including a meaningful career development that I would not be able to obtain in India. In Canada, I would be aware of global trends in my field of study, giving me an advantage over people who have never traveled outside of their home country.

Determined reasons to return back

- I intend to return with the same zeal with which I wish to study in Canada. **My affirmed reason to return back stems from my professional goals** of becoming a successful entrepreneur. I want to learn about worldwide financial planning procedures and practices so that I may apply them to the business I want to build. This will result in my company's unprecedented growth, as well as increased efficiency and effectiveness.
- Furthermore, having an affectionate temperament, I hold an intense love for my country, where I have grown up till now, and the family back here. My family consists of four members: my father, mother, me, and my brother. And, as the elder one, I bear a tremendous deal of responsibility for my family, supporting them both emotionally and financially. As a result, I have compelling personal motivations to return to my homeland.

Level of establishment

My family has been my most significant endorsement. My father has been running a successful business for years and hence has saved enough revenue to sponsor my education in Canada. Hence through his support, I have paid the one-year tuition fee of 15830 CAD in full and also purchased the Guaranteed Investment Certificate (GIC) worth \$10000 from The Bank of Nova Scotia, Toronto, Ontario.

Academic and professional Minutes

My accelerating career graph holds the pedigree of my education. With a well-rated result report through my schooling tenure, I had completed my high school and intermediate education from <school name> under the CBSE board. With entrepreneur skills running in my blood, soon after completing my senior secondary, I started my coaching center, in <year>, for the students of classes 11th and 12th, and began tutoring them in Economics and Commerce. Also, to actively widen my experience beyond the borders of academics, I set foot into my family business to promote and get more leads digitally. While simultaneously with an ardor to learn more about business entities, I did graduation in Business economics from Delhi University. Completing my under graduation in <year>, I then entirely got involved in my coaching class startup and decided to further surge through the students from Universities and Colleges. After running it for another year, I further enrolled myself in post-graduation program of Master's in Economics from Ambedkar University, Delhi. Along with it, I made my way into the professional world through an internship in <year>, at a private company as Financial Consultant. I was delegated with helping clients to find the most relevant financial products that can cater to the monetary scrutiny of their future needs.

Reasons for choosing financial Planning

While pursuing a Master's pandemic hit hard, the strict lockdowns were a devastating hit on tiny institutions and enterprises like mine and my father's. I recognized that, despite having studied business economics and finance in college, I still need to improvise my knowledge to deal efficiently with crises and instabilities in business. Therefore, to mitigate the losses due to uncertainty and to understand and take advantage of changing financial landscape, I decided to pursue a higher degree in finance.

Financial professionals are playing a critical role in influencing the global economy and charting its future paths as the speed of modernization accelerates. As a result, they bear a significant deal of responsibility for asset management and risk analysis to ensure that organizations and businesses continue to succeed. With a desire to become such a valuable asset to my country as a finance professional, I have chosen to enter the beautiful realms of finance administration through the avenues of the Financial Planning services course. I have chosen the financial planning services program after conducting an extensive study into what the various courses in the finance stream had to offer and how the knowledge would assist me in the long term. Financial planning may assist me in comprehending and learning about the various channels via which any organization can manage its finances in the most efficient and lucrative manner possible, as well as make informed investment decisions.

Through the course, I will learn to apply accepted financial planning concepts and industry standards to the analysis of financial requirements and capital investment, as well as how the stock market works. Combining this information with my understanding of economics will enable me to examine the consequences of various policy actions on company stock prices and invest accordingly to improve my income prospects. I'll be able to expand my family's company while simultaneously teaching it as a subject at my coaching center, which will benefit both the students and my institute.

Why Conestoga College?

The fact that this college offers the best finance education is one of the reasons I chose it to continue my studies. Conestoga College is well-known in the educational community. It comes in the top 100 institutions in the country, and it is ranked 12th among the top 50 colleges in terms of research. It does, however, have several affiliations with top-tier commercial industries, each of which can provide a bright future through its training and skills. It prepares graduates for a variety of financial sector jobs and gives them useful instructions for running their firm efficiently and effectively. Also, the best combination of theoretical and practical study is imparted here. As a result, I'm looking forward to testing myself in such an environment and learning from renowned instructors while connecting with ambitious and motivated classmates.

Why Canada?

I've aligned myself with the beliefs of over 6,00,000 students around the world who believe that Canada is the best destination to get foreign education exposure. There are various reasons why Canada has emerged as the most ideal location for gaining an education. Starting with high-quality education and a comprehensive curriculum, Canada has created a curriculum that is properly balanced between theoretical and practical activities. The country is more developed than India, with a more polished and matures financial understanding, which will undoubtedly aid me in better financial planning for my family's business in my own country. While the country's cosmopolitan view and secure atmosphere are added the icing on the cake, the living conditions in Canada also amaze me.

Language Abilities

Being full enthusiastic about pursuing further edification from a foreign land I, therefore, gave my English proficiency fulfilling one of the requirements for its application and hence scored **an overall score of 7.0 bands** with each score as:
Listening: 7.0 Writing: 7.0 Speaking: 7.0 Reading: 6.5

Future prospects

Professional aspirations and intellectual curiosity in the world of finance drive my desire and excitement for additional study and research. Furthermore, I would become skilled at analyzing large picture phenomena such as market trends, sales forecasting, competitor actions, and so on. Therefore, after completing the financial planning services program I intend to return to India as a highly qualified financial professional with foreign experience. Financial planning has emerged as a promising field in India, with an increase in stock market involvement among the country's youth. Hence, I'll try to apply what I've learned to the Indian stock market. I also hope to improve the efficacy and efficiency of my family firm by combining my intellect with finance and economics. With respect to the Indian Education System, I anticipate that there is a lack of awareness among the youth regarding knowledge about Financial-systems and their working. Therefore, in the long haul, I wish to address this stumbling block and enlighten the youngsters to the best of my knowledge.

Conclusion

So, diving into the unfathomable complexities of financial planning services with a foundation of knowledge in financial principles and practices, learning from world-renowned instructors and top students from around the world would enrich me with the broad and deep learning experience, therefore eagerly waiting for a positive response from our end.

Regards
